

Fitness Coaching Lead Magnet Template Pack 2026

5 Ready-to-Use Templates to Grow Your Fitness Coaching Business

Published by Sovereign Digital Agency

Updated March 2026

Sovereign Digital Agency - sovereigndigitalagency.co.uk.

Welcome to Your Lead Magnet Template Pack

Inside this pack you will find five professionally written, conversion-tested lead magnet templates designed specifically for fitness coaches and personal trainers. Each template is ready to customise with your brand name, logo, and personal style -- then deploy immediately to start attracting your ideal clients.

Every template contains complete, publish-ready content that showcases your expertise, builds trust with prospects, and naturally leads them toward signing up for your programme or booking a consultation.

Simply replace [YOUR NAME], [YOUR BUSINESS], and any bracketed placeholders with your own details.

TEMPLATE 1: The Fitness Readiness Assessment -- 10-Point Checklist

Use this as a downloadable PDF on your website. Prospects complete it and immediately see where they need help -- making them warm leads.

--- BEGIN TEMPLATE ---

ARE YOU ACTUALLY READY TO TRANSFORM YOUR BODY?

The 10-Point Fitness Readiness Assessment

By [YOUR NAME], [YOUR CREDENTIALS] | [YOUR BUSINESS]

Instructions: Check each box that is TRUE for you right now. Be brutally honest -- there are no wrong answers, only useful data.

THE ASSESSMENT:

1. I have a specific, measurable fitness goal (not just 'get fit' or 'lose weight', but a concrete target like 'lose 10kg in 16 weeks' or 'run 5K in under 25 minutes').
2. I currently exercise at least 2 times per week consistently, even if the sessions are not ideal. I have an established baseline of regular movement.
3. I can name at least 5 foods I ate yesterday and roughly estimate whether I was in a caloric surplus or deficit. I have basic awareness of my nutrition.
4. I sleep 7+ hours per night on most nights. I understand that sleep is when my body actually builds muscle and burns fat.
5. I have no undiagnosed injuries or pain that I have been ignoring. (If you are training through pain, this is a red flag that needs addressing first.)
6. I am willing to commit at least 4 hours per week to training for a minimum of 12 weeks. I understand that real results require consistency, not intensity.
7. I have access to equipment or a gym, OR I am willing to invest in basic home equipment (resistance bands, dumbbells, pull-up bar).
8. My motivation is internal (I want to feel strong, healthy, and confident) rather than purely external (someone told me

I should lose weight, or I have a holiday in 3 weeks).

9. I am willing to track my workouts, nutrition, and progress measurements. I understand that what gets measured gets improved.
10. I am open to learning and being coached, even if it means changing habits I have had for years. I am coachable.

YOUR SCORE:

8-10 Checked: You are primed for a serious transformation. You have the foundation -- now you need the right programme and accountability to execute.

5-7 Checked: You are almost ready. There are 2-3 gaps that, if addressed, would make the difference between another failed attempt and a genuine transformation.

2-4 Checked: You need to build your foundation first. Jumping straight into an intense programme right now would likely lead to burnout or injury. Start with habit-building.

0-1 Checked: Do not despair. Everyone starts somewhere. The fact that you took this assessment shows you care. Let's build your readiness before we build your body.

[YOUR NAME] offers a free 20-minute Fitness Strategy Call to review your assessment and create a personalised starting plan.

TEMPLATE 2: 5 Training Mistakes Killing Your Progress -- Mini-Guide

This educates prospects while demonstrating your expertise. Works as a PDF, blog post, or email series.

--- BEGIN TEMPLATE ---

5 TRAINING MISTAKES THAT ARE KILLING YOUR PROGRESS

(And What to Do Instead)

By [YOUR NAME], [YOUR CREDENTIALS]

If you have been training consistently but your results have stalled -- or never really started -- there is a good chance you are making one or more of these five mistakes. They are incredibly common, even among experienced gym-goers, and they are the reason most people look the same year after year despite spending hundreds of hours training.

MISTAKE 1: Programme Hopping Every 2-3 Weeks

You found a new workout on Instagram. Or a mate told you about a different split. Or you read that German Volume

Training is the secret. So you switch. Again.

Here is the truth: almost any sensible programme will work if you stick with it for 8-12 weeks with progressive overload. But no programme works in 2-3 weeks. Muscle adaptation takes time. Strength gains take time. The magic happens between weeks 6 and 12 -- exactly when most people get bored and switch.

The Fix: Choose one programme and commit to it for a minimum of 8 weeks. Track every session. Aim to add weight, reps, or sets each week. Judge results at the end, not during.

MISTAKE 2: Ignoring Progressive Overload

You do the same exercises, with the same weight, for the same reps, week after week. Your body adapted to this stimulus months ago. It has no reason to change.

Progressive overload is the single most important principle in training. Your body only builds muscle and strength when it is forced to handle more than it previously could.

The Fix: Keep a training log. Every session, try to beat your previous performance in at least one way: more weight, more reps, more sets, slower tempo, shorter rest periods. Even 1 extra rep is progress.

MISTAKE 3: Neglecting Nutrition (Or Overcomplicating It)

You cannot out-train a poor diet. You also cannot optimise what you are not tracking. Most people either ignore nutrition completely or get lost in unnecessary complexity -- worrying about meal timing, supplement stacks, and macro ratios when they have not even nailed the basics.

The Fix: Start with these 3 non-negotiables before worrying about anything else: (1) Eat 1.6-2.2g protein per kg of bodyweight daily. (2) Eat in a slight caloric deficit to lose fat or a slight surplus to build muscle. (3) Eat at least 5 portions of fruits and vegetables daily. Master these for 4 weeks before adding complexity.

MISTAKE 4: Training Too Hard, Too Often

More is not better. Better is better. Training 6-7 days per week with maximum intensity leads to chronic fatigue, elevated cortisol, poor recovery, and eventually injury or illness.

Your muscles do not grow in the gym. They grow during recovery. If you are not recovering, you are not growing -- you are just accumulating damage.

The Fix: Train 3-5 days per week with proper intensity. Ensure you have at least 2 full rest days. Deload every 4-6 weeks (reduce volume by 40-50% for one week). Prioritise 7-8 hours of sleep.

MISTAKE 5: No Clear Metrics or Accountability

If you cannot tell me your bench press 3 months ago versus today, your body weight trend over the last 8 weeks, and your average daily protein intake -- you are guessing. And guessing does not build results.

The Fix: Track 4 things weekly: (1) Training loads for your key lifts. (2) Body weight (average of 3+ daily weigh-ins). (3) Progress photos every 2 weeks. (4) Daily protein intake. This takes 5 minutes per day and is the difference between spinning your wheels and genuine transformation.

Ready for a programme that eliminates all 5 mistakes? [YOUR NAME] creates personalised training and nutrition plans with built-in accountability.

TEMPLATE 3: The 12-Week Transformation Planner -- Goal Setting Worksheet

This gives prospects a structured planning tool and a taste of your coaching methodology.

--- BEGIN TEMPLATE ---

THE 12-WEEK BODY TRANSFORMATION PLANNER

By [YOUR NAME] | [YOUR BUSINESS]

This planner will help you set clear, achievable fitness goals and create a week-by-week action plan. Complete every section honestly.

STEP 1: BASELINE MEASUREMENTS (Record Today's Numbers)

Date: _____

Body Weight: _____ kg/lbs

Body Fat % (estimated): _____ %

Waist Measurement: _____ cm/inches

Chest Measurement: _____ cm/inches

Hips Measurement: _____ cm/inches

Arm Measurement (flexed): _____ cm/inches

Key Lift Numbers:

Squat: _____ kg x _____ reps

Bench Press: _____ kg x _____ reps

Deadlift: _____ kg x _____ reps

Overhead Press: _____ kg x _____ reps

Pull-ups: _____ reps

(Take front, side, and back progress photos today. Store them somewhere you will not lose them.)

STEP 2: 12-WEEK GOALS

Primary Goal (choose one): ☐ Fat Loss ☐ Muscle Gain ☐ Strength ☐ Athletic Performance

Specific Target: _____

(Example: Lose 8kg of body fat while maintaining muscle mass)

Why This Matters to Me: _____

(Deep reason, not surface -- not 'look good' but 'feel confident and energised for my kids')

STEP 3: WEEKLY TRAINING SCHEDULE

Monday: _____

Tuesday: _____

Wednesday: _____

Thursday: _____

Friday: _____

Saturday: _____

Sunday: _____

Training Time: ____:____ to ____:____

Training Location: _____

STEP 4: NUTRITION FRAMEWORK

Daily Calorie Target: _____ kcal

Protein Target: _____g (aim for 2g per kg bodyweight)

Meal Frequency: _____ meals per day

Meal Prep Day: _____

My 5 Go-To Protein Sources:

1. _____ 2. _____ 3. _____

4. _____ 5. _____

STEP 5: 12-WEEK CHECKPOINT SCHEDULE

Week 4 Check-In Date: _____

- Retake measurements and photos
- Review training log for progressive overload
- Adjust calories if needed

Week 8 Check-In Date: _____

- Full measurement and photo comparison
- Assess programme -- switch exercises if needed
- Check adherence percentage

Week 12 Final Assessment Date: _____

- Complete measurements, photos, and lift numbers
- Compare to baseline
- Plan next 12-week phase

STEP 6: ACCOUNTABILITY AND CONTINGENCY

My accountability partner: _____

If I miss a session, my rule is: _____

My biggest potential obstacle: _____

My plan for that obstacle: _____

Want expert programming and weekly accountability check-ins? [YOUR NAME] offers personalised 12-week transformation programmes with guaranteed results.

TEMPLATE 4: The Nutrition Quick Reference Card -- Cheat Sheet

A single-page reference that clients and prospects pin to their fridge. Keeps you top of mind daily.

--- BEGIN TEMPLATE ---

NUTRITION CHEAT SHEET

The Only Reference Card You Need to Eat for Results

By [YOUR NAME] | [YOUR WEBSITE]

PROTEIN (Your #1 Priority -- Hit This Daily):

Target: 1.6-2.2g per kg of bodyweight

- Chicken breast (100g) = 31g protein
- Salmon (100g) = 25g protein
- Greek yoghurt (200g) = 20g protein
- Eggs (2 large) = 13g protein
- Whey protein scoop = 24g protein
- Cottage cheese (200g) = 22g protein
- Lean beef mince (100g) = 21g protein

- Tinned tuna (120g) = 30g protein
- Tofu firm (100g) = 17g protein
- Lentils cooked (200g) = 18g protein

CALORIE TARGETS (Simple Method):

- Fat loss: Bodyweight in kg x 24-26 = daily calories
- Maintenance: Bodyweight in kg x 28-32 = daily calories
- Muscle gain: Bodyweight in kg x 32-36 = daily calories

PLATE METHOD (No Calorie Counting Required):

- 1/3 plate: Lean protein (palm-sized portion)
- 1/3 plate: Vegetables or salad (fist-sized or more)
- 1/4 plate: Complex carbs (cupped-hand portion)
- Thumb-sized: Healthy fats (olive oil, avocado, nuts)

MEAL TIMING (Keep It Simple):

- Eat 3-5 meals per day at roughly consistent times
- Protein at every meal (distribute evenly through the day)
- Largest carb portion around training (pre or post workout)
- Stop eating 2-3 hours before bed for better sleep quality

HYDRATION:

- Minimum: 35ml per kg bodyweight daily (80kg person = 2.8 litres)
- Add 500ml for every hour of exercise
- Clear or light yellow urine = well hydrated
- Coffee counts toward fluid intake but limit to 3-4 cups before 2pm

SUPPLEMENTS WORTH TAKING (Everything Else Is Optional):

- Creatine monohydrate: 5g daily (most researched supplement in existence)
- Vitamin D3: 2000-4000 IU daily (especially in the UK)
- Omega-3 fish oil: 2-3g daily (if you eat fish less than 3x/week)
- Whey protein: Only if you struggle to hit protein target from food

FOODS TO MINIMISE (Not Eliminate):

- Ultra-processed snacks (crisps, biscuits, sweets)
- Sugary drinks (juice, fizzy drinks, fancy coffees)
- Alcohol (reduces protein synthesis by up to 37%)
- Takeaways (hard to estimate calories accurately)

THE 80/20 RULE: Hit your protein and calorie targets with whole foods 80% of the time. The other 20% can be flexible. Sustainability beats perfection.

Need a personalised nutrition plan? [YOUR NAME] builds custom meal plans matched to your goals, preferences, and

lifestyle.

TEMPLATE 5: Rate Your Fitness Level -- Self-Assessment Scorecard

An engaging quiz that helps prospects self-identify their level and see the gap between where they are and where they want to be.

--- BEGIN TEMPLATE ---

RATE YOUR FITNESS LEVEL

The Complete Self-Assessment Scorecard

By [YOUR NAME], [YOUR CREDENTIALS]

Instructions: For each statement, rate yourself from 1 to 5.

1 = Not At All | 2 = Rarely | 3 = Sometimes | 4 = Usually | 5 = Always

SECTION A -- TRAINING CONSISTENCY:

A1. I complete all my planned training sessions each week. ____

A2. I follow a structured programme rather than random workouts. ____

A3. I progressively increase my training loads over time. ____

A4. I train with proper form and full range of motion. ____

A5. I include both strength training and cardiovascular work. ____

Section A Total: ____/25

SECTION B -- NUTRITION:

B1. I hit my daily protein target consistently. ____

B2. I eat mostly whole, minimally processed foods. ____

B3. I plan and prepare my meals in advance. ____

B4. I stay within my calorie target for my goal. ____

B5. I eat at least 5 portions of fruits and vegetables daily. ____

Section B Total: ____/25

SECTION C -- RECOVERY:

C1. I sleep 7-8 hours per night consistently. ____

C2. I take at least 2 rest days per week. ____

C3. I manage stress effectively (it does not disrupt my training). ____

C4. I stretch or do mobility work at least 3 times per week. ____

C5. I listen to my body and adjust training when fatigued. ____

Section C Total: ____/25

SECTION D -- MINDSET AND HABITS:

- D1. I set specific fitness goals and write them down. ____
- D2. I track my workouts and measure my progress. ____
- D3. I stay motivated even when results slow down. ____
- D4. I am consistent with my routine regardless of how I feel. ____
- D5. I educate myself about training and nutrition regularly. ____
- Section D Total: ____/25

GRAND TOTAL: ____/100

85-100: Elite Level -- You have exceptional training habits. A coach can help you break through plateaus and peak.

65-84: Intermediate Level -- Strong foundation with clear areas to optimise. Targeted coaching could accelerate your progress by 2-3x.

45-64: Developing Level -- You are building good habits but inconsistency is limiting your results. Structure and accountability will change everything.

25-44: Beginner Level -- You are at the starting line, and that is an exciting place to be. The right coaching programme could deliver a visible transformation in 12 weeks.

Your lowest section score reveals your biggest bottleneck. Fix that, and everything else improves.

[YOUR NAME] offers a free Fitness Assessment Call to review your scorecard and create your 12-week game plan.

How to Use These Templates

You now have five complete, professionally written lead magnets. Here is exactly how to deploy them for maximum client attraction.

- 1.** Customise the Content: Replace every bracketed placeholder with your real details. Add your certifications, adjust exercise recommendations to match your training philosophy, and include your own client success stories where relevant. Add your logo and brand colours to each template.
- 2.** Choose Your Format: The fitness assessment checklist and nutrition cheat sheet work best as single-page PDFs that clients can print. The mistakes guide works as a blog post or email series. The transformation planner works as a multi-page PDF workbook. The quiz is best deployed on an interactive platform like ScoreApp or Typeform.
- 3.** Set Up Your Opt-In: Create a landing page with a strong headline like 'Free: The 12-Week Transformation Planner Used By My Clients To Lose 10kg' and an email capture form. Deliver the template automatically on signup.

4. Build Your Follow-Up Sequence: Email 1 (immediate): deliver the lead magnet. Email 2 (day 2): share a client transformation story. Email 3 (day 4): deliver a bonus training tip. Email 4 (day 7): address the 'I do not have time' objection. Email 5 (day 10): invite them to a free consultation or trial session.
5. Drive Traffic: Post transformation content on Instagram with a CTA to download. Create YouTube shorts demonstrating exercises from your programme. Share the nutrition cheat sheet in fitness Facebook groups (with permission). Run targeted Instagram ads to your landing page -- even GBP5/day reaches your local area effectively.
6. Track and Optimise: Monitor your opt-in rate, email open rates, and consultation booking rate. The nutrition cheat sheet and fitness quiz typically convert highest for fitness coaches. Double down on what works and create variations.

PRO TIPS FOR FITNESS COACHES:

- Include before/after photos of real clients (with permission) alongside your templates for social proof.
- The nutrition cheat sheet is the most shareable template -- prospects forward it to friends, expanding your reach.
- Use the 12-week planner as a bridge to your paid programme: 'Complete this planner, then let me build the actual programme for you.'
- Film a quick video walkthrough of each template for your Instagram or YouTube -- personal connection dramatically increases conversion.
- Update seasonally: New Year (resolutions), spring (summer body), September (back to routine).
