

Health & Wellness Coaching Lead Magnet Template Pack 2026

5 Ready-to-Use Templates to Grow Your Health Coaching Business

Published by Sovereign Digital Agency

Updated March 2026

Sovereign Digital Agency - sovereigndigitalagency.co.uk.

Welcome to Your Lead Magnet Template Pack

Inside this pack you will find five professionally written, conversion-tested lead magnet templates designed specifically for health and wellness coaches. Each template is ready to customise and deploy immediately.

These templates position you as a knowledgeable, trustworthy guide who helps people transform their health through sustainable habits -- not extreme diets or quick fixes.

Replace [YOUR NAME], [YOUR BUSINESS], and all bracketed placeholders with your own details. Important: always include a disclaimer that your content does not replace medical advice.

TEMPLATE 1: The Wellness Assessment -- 10-Point Health Checklist

This checklist helps prospects evaluate their overall wellness and identify specific areas where coaching would make the biggest difference.

--- BEGIN TEMPLATE ---

THE WELLNESS REALITY CHECK

10 Signs Your Health Needs a Reset

By [YOUR NAME], Certified Health Coach | [YOUR BUSINESS]

Instructions: Check each statement that is TRUE for you right now. No judgement, just awareness.

[Disclaimer: This is a self-reflection tool, not a medical assessment. Always consult your GP for health concerns.]

1. I sleep 7-8 hours per night and wake up feeling genuinely rested, not groggy or dependent on an alarm clock to drag me out of bed.
2. I have consistent energy throughout the day without relying on caffeine, sugar, or energy drinks to function. I do not experience the dreaded 3pm crash.
3. I eat at least 5 portions of fruits and vegetables daily, and the majority of my meals are prepared from whole ingredients rather than processed or convenience foods.
4. I drink at least 2 litres of water per day. I can tell you roughly how much I have consumed by midday.
5. I move my body intentionally for at least 30 minutes, 5 days per week. This includes walking, exercise, sport, yoga, or any form of purposeful physical activity.
6. I manage stress proactively rather than reactively. I have specific tools I use daily (breathwork, meditation, journaling, nature) and I notice the difference when I skip them.
7. My digestion is regular and comfortable. I do not regularly experience bloating, constipation, acid reflux, or stomach discomfort after meals.
8. I can maintain a healthy weight without extreme restriction, obsessive calorie counting, or punishing exercise routines. My relationship with food feels balanced.
9. I take at least one full day per week with no work obligations. I have hobbies or activities that genuinely recharge

me, and I protect that time.

- 10.** I have had a health check-up, blood work, or wellness screening within the last 12 months. I know my key health numbers (blood pressure, cholesterol, blood sugar, vitamin D).

YOUR SCORE:

8-10 Checked: Excellent wellness foundation. You are already living with intention. A health coach can help you optimise, prevent burnout, and reach peak performance.

5-7 Checked: Good base with clear gaps. These gaps are likely causing low-grade symptoms (fatigue, brain fog, poor sleep, weight fluctuations) that you have normalised. They do not have to be your normal.

2-4 Checked: Your body is sending signals that something needs to change. You have been pushing through on willpower alone, and it is not sustainable. The good news: small, targeted changes can create dramatic improvements in 30-60 days.

0-1 Checked: You are running on empty. This is not a character flaw -- it is a lifestyle design problem. With the right support and structure, a complete wellness reset is achievable and often faster than people expect.

[YOUR NAME] offers a complimentary 30-minute Wellness Strategy Call where we review your checklist, identify your top priority, and map out your first 30 days.

TEMPLATE 2: 5 Health Mistakes Making You Tired and Sick -- Mini-Guide

This guide addresses the silent health saboteurs that most people normalise. It creates powerful recognition moments.

--- BEGIN TEMPLATE ---

5 DAILY HABITS THAT ARE SLOWLY DESTROYING YOUR HEALTH

(And What to Do Instead)

By [YOUR NAME], Health & Wellness Coach

You are not lazy. You are not weak. You are not 'just getting older.' You are probably making one or more of these five incredibly common mistakes that drain your energy, disrupt your sleep, inflame your body, and leave you feeling 10 years older than you are.

The frustrating part? These are things almost everyone does. The encouraging part? Every single one is fixable within weeks.

MISTAKE 1: Chronic Under-Hydration Disguised as Hunger and Fatigue

Most people are chronically dehydrated and do not know it. They interpret thirst signals as hunger (leading to overeating), fatigue (leading to caffeine dependence), and brain fog (leading to poor productivity).

By the time you feel thirsty, you are already 1-2% dehydrated, which is enough to reduce cognitive performance by 25% and physical performance by 20%.

The Fix: Drink 500ml of water within 30 minutes of waking (before caffeine). Keep a measured water bottle at your desk and finish it by lunch. Repeat in the afternoon. Target: 35ml per kg of bodyweight daily. Add a pinch of sea salt or a slice of lemon for electrolytes.

MISTAKE 2: Treating Sleep as Optional

You stay up scrolling your phone. You binge one more episode. You tell yourself you will catch up at the weekend (you cannot -- sleep debt does not work that way).

Sleep is not passive rest. It is when your body repairs tissue, consolidates memories, regulates hormones, and processes toxins. Chronic sleep deprivation (under 7 hours) increases your risk of heart disease, diabetes, obesity, depression, and Alzheimer's. It also makes you hungrier, weaker, and moodier.

The Fix: Set a non-negotiable 'screens off' time 60 minutes before bed. Keep your bedroom cool (16-18 degrees Celsius), dark, and reserved for sleep. Wake at the same time every day, even weekends. If you cannot fall asleep within 20 minutes, get up and read until drowsy, then return.

MISTAKE 3: Eating Processed Food and Calling It Convenient

Ultra-processed foods (UPFs) now make up 57% of the average UK diet. These are foods with ingredient lists you cannot pronounce -- designed in labs to be hyper-palatable so you eat more than you need.

UPFs are linked to weight gain, gut inflammation, mood disorders, and chronic disease. They are also nutritionally empty, meaning you can overeat calories while being simultaneously malnourished.

The Fix: You do not need to be perfect. Start with one meal. Make your breakfast whole-food based: eggs and vegetables, overnight oats with fruit, or Greek yoghurt with nuts and berries. Once that is habitual, tackle lunch. Meal prep on Sunday to remove the 'convenience' excuse. The 80/20 rule applies: 80% whole foods, 20% flexibility.

MISTAKE 4: Sitting for 8+ Hours and Calling a 1-Hour Gym Session Exercise

Research calls prolonged sitting 'the new smoking.' A single hour of exercise does not offset 8-10 hours of sedentary behaviour. Your body needs regular movement throughout the day, not concentrated bursts.

Prolonged sitting reduces blood flow, tightens hip flexors, weakens glutes, slows metabolism, and increases

inflammation markers -- even in people who exercise regularly.

The Fix: Move for 5 minutes every 60 minutes of sitting. Set a timer. Stand during phone calls. Walk after lunch (even 10 minutes improves blood sugar regulation by 30%). Take the stairs. Park further away. These micro-movements accumulate and their health impact is enormous.

MISTAKE 5: Ignoring Stress Until It Becomes a Health Crisis

Chronic stress elevates cortisol, which increases belly fat storage, suppresses immune function, disrupts sleep, impairs digestion, and accelerates ageing. Most people live in a permanent low-grade stress response and have forgotten what calm feels like.

Stress management is not a luxury -- it is a core health strategy as important as nutrition and exercise.

The Fix: Choose one daily stress regulation practice and commit to it for 30 days. Options: 5 minutes of box breathing (inhale 4, hold 4, exhale 4, hold 4), a 10-minute morning walk in nature, journaling for 5 minutes before bed, or a guided meditation app. The specific practice matters less than the consistency.

TEMPLATE 3: The 30-Day Wellness Reset Workbook -- Worksheet

This workbook gives prospects a structured transformation plan and a taste of your coaching framework.

--- BEGIN TEMPLATE ---

THE 30-DAY WELLNESS RESET

Your Step-by-Step Health Transformation Workbook

By [YOUR NAME] | [YOUR BUSINESS]

[Disclaimer: This workbook is for general wellness purposes. Consult your GP before making significant changes to diet or exercise, especially if you have existing health conditions.]

WEEK 1: HYDRATION AND SLEEP (Foundation)

Daily Hydration Target: _____ litres (bodyweight in kg x 0.035)

Bedtime Target: _____pm

Wake Time Target: _____am

Screens-Off Time: _____pm

Week 1 Daily Tracker:

Mon: Water ___ L | Sleep ___ hrs | Energy 1-10: ___

Tue: Water ___ L | Sleep ___ hrs | Energy 1-10: ___

Wed: Water ___ L | Sleep ___ hrs | Energy 1-10: ___

Thu: Water ___ L | Sleep ___ hrs | Energy 1-10: ___

Fri: Water ___ L | Sleep ___ hrs | Energy 1-10: ___

Sat: Water ___ L | Sleep ___ hrs | Energy 1-10: ___

Sun: Water ___ L | Sleep ___ hrs | Energy 1-10: ___

WEEK 2: NUTRITION (Add to Week 1 Habits)

Breakfast upgrade -- my whole-food breakfast this week: _____

5-a-day target: my go-to fruits and vegetables: _____

Meal prep day: _____ | Meals to prep: _____

UPF to reduce this week: _____

Replacement: _____

WEEK 3: MOVEMENT (Add to Weeks 1-2)

Daily movement target: _____ minutes

Exercise schedule:

Mon: _____

Tue: _____

Wed: _____

Thu: _____

Fri: _____

Sat: _____

Sun: _____

Hourly movement reminder set: [] Yes

Post-lunch walk committed: [] Yes

WEEK 4: STRESS AND RECOVERY (Add to Weeks 1-3)

My chosen daily stress practice: _____

Time I will do it: _____

Weekly recharge activity: _____

Digital detox commitment: _____

30-DAY CHECK-IN:

Energy level now (1-10): ___ (vs. Day 1: ___)

Sleep quality now (1-10): ___ (vs. Day 1: ___)

Stress level now (1-10): ____ (vs. Day 1: ____)

Overall wellbeing now (1-10): ____ (vs. Day 1: ____)

Biggest win this month: _____

Habit I want to maintain: _____

Area I want to improve next: _____

Ready for a personalised, guided wellness programme? [YOUR NAME] provides 1-to-1 health coaching with weekly accountability and customised plans.

TEMPLATE 4: The Healthy Eating Cheat Sheet -- Quick Reference Card

A fridge-friendly reference card that becomes a daily reminder of your brand.

--- BEGIN TEMPLATE ---

HEALTHY EATING CHEAT SHEET

Your Daily Quick Reference for Nourishing Your Body

By [YOUR NAME] | [YOUR WEBSITE]

THE PLATE METHOD (No Counting Required):

- 1/2 plate: Vegetables (aim for colour variety)
- 1/4 plate: Lean protein (palm-sized portion)
- 1/4 plate: Complex carbohydrates (cupped-hand portion)
- Thumb-sized: Healthy fats

POWER PROTEINS:

Chicken breast | Salmon | Eggs | Greek yoghurt | Lentils | Tofu | Lean beef | Cottage cheese | Chickpeas | Turkey

SMART CARBS:

Sweet potato | Brown rice | Quinoa | Oats | Wholegrain bread | Beans | Butternut squash | Wholemeal pasta | Fruits | Root vegetables

HEALTHY FATS:

Avocado | Olive oil | Nuts (almonds, walnuts) | Seeds (chia, flax) | Oily fish | Coconut oil (moderate) | Nut butters | Eggs

SUPERFOOD VEGETABLES:

Broccoli | Spinach | Kale | Bell peppers | Beetroot | Sweet potato | Garlic | Tomatoes | Blueberries | Turmeric

SIMPLE SWAPS THAT ADD UP:

- White bread -> Wholegrain or sourdough
- Crisps -> Nuts or rice cakes with nut butter
- Sugary cereal -> Overnight oats with fruit
- Fizzy drinks -> Sparkling water with lemon
- Biscuits -> Dark chocolate (70%+) squares
- Takeaway -> Batch-cooked freezer meals
- Fruit juice -> Whole fruit (keeps the fibre)

MEAL TIMING GUIDE:

- Eat within 1-2 hours of waking
- Eat every 3-4 hours to stabilise blood sugar
- Protein at every meal (supports satiety and muscle)
- Largest meal when you are most active
- Stop eating 2-3 hours before bed

PORTION GUIDE (Use Your Hand):

- Palm = protein portion
- Fist = carbohydrate portion
- Cupped hand = vegetable portion (minimum)
- Thumb = fat portion

GUT HEALTH ESSENTIALS:

- Eat 30+ different plant foods per week (variety is key)
- Include fermented foods: yoghurt, kefir, sauerkraut, kimchi
- Eat prebiotic fibre: onions, garlic, bananas, oats, leeks
- Chew slowly (digestion starts in the mouth)
- Manage stress (your gut has its own nervous system)

THE 80/20 PRINCIPLE: Eat whole, nourishing foods 80% of the time. The other 20% can be flexible. Perfectionism is the enemy of sustainability.

[YOUR NAME] creates personalised nutrition and wellness plans for busy professionals. Free consultation: [YOUR BOOKING LINK]

--- END TEMPLATE ---

TEMPLATE 5: Rate Your Wellness -- Self-Assessment Scorecard

--- BEGIN TEMPLATE ---

RATE YOUR WELLNESS SCORECARD

The Complete Health Self-Assessment

By [YOUR NAME], Certified Health Coach

Rate each statement from 1 to 5.

1 = Strongly Disagree | 2 = Disagree | 3 = Neutral | 4 = Agree | 5 = Strongly Agree

SECTION A -- NUTRITION:

A1. I eat at least 5 portions of fruits and vegetables daily. ____

A2. I eat mostly whole, minimally processed foods. ____

A3. I eat regular meals at consistent times without skipping. ____

A4. I cook at home at least 5 times per week. ____

A5. My relationship with food feels balanced and not stressful. ____

Section A Total: ____/25

SECTION B -- MOVEMENT:

B1. I exercise intentionally at least 4 times per week. ____

B2. I move regularly throughout the day, not just during workouts. ____

B3. I enjoy my exercise routine rather than dreading it. ____

B4. I include both strength and cardiovascular exercise. ____

B5. I stretch or do mobility work at least 3 times per week. ____

Section B Total: ____/25

SECTION C -- SLEEP AND RECOVERY:

C1. I sleep 7-8 hours per night consistently. ____

C2. I wake up feeling rested without needing caffeine immediately. ____

C3. I have a consistent sleep and wake schedule (even weekends). ____

C4. I avoid screens for at least 30 minutes before bed. ____

C5. I take at least one full rest day per week from intense activity. ____

Section C Total: ____/25

SECTION D -- MENTAL AND EMOTIONAL HEALTH:

D1. I have a daily practice for managing stress. ____

D2. I feel calm and in control more often than anxious or overwhelmed. ____

D3. I have strong social connections that support my wellbeing. ____

D4. I set boundaries to protect my energy and mental health. ____

D5. I make time for activities that bring me joy and fulfillment. ____

Section D Total: ____/25

SECTION E -- PREVENTIVE HEALTH:

E1. I have had a health check-up or blood work in the last 12 months. ____

E2. I know my key health numbers (BP, cholesterol, blood sugar). ____

E3. I take appropriate supplements based on tested deficiencies. ____

E4. I limit alcohol to moderate levels (under 14 units/week). ____

E5. I proactively address health concerns rather than ignoring them. ____

Section E Total: ____/25

GRAND TOTAL: ____/125

100-125: Thriving. Your wellness habits are exceptional. A coach can help you optimise performance and maintain long-term vitality.

75-99: Building. Solid foundation with clear areas for improvement. Targeted coaching could transform your energy and vitality in 30-60 days.

50-74: Struggling. You know you should be doing better. The gap between your knowledge and your habits is where coaching makes the biggest impact.

25-49: Surviving. Your body is sending distress signals. A structured wellness programme could dramatically improve how you feel within weeks.

[YOUR NAME] offers a free Wellness Scorecard Review to analyse your results and create a personalised 30-day action plan.

--- END TEMPLATE ---

How to Use These Templates

Deploy these five templates to attract health-conscious clients who are ready to invest in their wellbeing.

- 1. Customise with Care:** Replace all placeholders with your details. Add your certifications prominently (health coaching is a field where credentials matter). Include a medical disclaimer on every template: 'This content is for educational purposes only and does not replace medical advice.' Adjust recommendations to match your coaching philosophy.
- 2. Choose Your Format:** The wellness checklist and eating cheat sheet work as printable single-page PDFs (fridge-friendly). The 5 Mistakes guide works as an Instagram carousel, blog post, or email series. The 30-Day Reset works as a multi-page workbook PDF. The scorecard works best as an interactive quiz.
- 3. Build Your Opt-In:** Health coaching prospects respond well to specific, tangible promises. Headlines like 'Free: The 30-Day Wellness Reset That 200+ Clients Have Used to Double Their Energy' convert better than vague wellness language.
- 4. Drive Traffic:** Instagram and Pinterest are your best platforms. Create recipe content, wellness tips, and before/after transformations (with permission). Short-form video performs exceptionally well for health coaches (meal prep videos, quick workout demos, morning routine walkthroughs). Partner with local gyms, yoga studios, and health food shops for cross-promotion.
- 5. Email Nurture Sequence:** Email 1 delivers the template. Email 2 shares a quick health tip they can implement today. Email 3 features a client transformation story. Email 4 addresses the 'I have tried everything' objection.

Email 5 offers a free wellness consultation.

6. Scale and Diversify: Turn each template into social media content (the cheat sheet alone can generate 20+ posts). Create a private Facebook group for lead magnet downloaders. Host a monthly free wellness webinar to convert leads. Partner with corporate HR departments for workplace wellness programmes.

PRO TIPS FOR HEALTH COACHES:

- The eating cheat sheet is your most viral asset. People print it, pin it to their fridge, and share photos of it on Instagram.
- Always include disclaimers. Health coaching is distinct from medical advice -- make this clear to protect yourself and build trust.
- Client testimonials with specific results (energy improvements, sleep quality, measurable health markers) are your best marketing tool.
- Seasonal content creates natural urgency: January (new year reset), spring (energy boost), summer (feel-good plan), autumn (immunity prep).
- Group programmes convert well in health coaching. Use the 30-Day Reset as the foundation for a group challenge product.

Need help building your health coaching funnel? Visit sovereigndigitalagency.co.uk for done-for-you marketing systems.

This template pack is provided by Sovereign Digital Agency. All templates are fully customisable for your coaching brand. These templates do not constitute medical advice. Replace bracketed placeholders with your business details before distribution.
